**Subject:** Microsoft Settlement

I wanted to comment on the microsoft settlement that has been reached.

Microsoft needs to be punished more than this settlement proposes for its anticompetitive, anti-innovative practices. Due to its monopoly there has been a squash on Operating Systems competition due to the inability for other superior OSes to compete with Microsoft Windows. These operating systems such as Macintosh OS, need to be given a chance. This settlement does not provide enough to resolve the problem of the Microsoft monopoly and its ranging effects on competition.
